Abstract of JP10210504

PROBLEM TO BE SOLVED: To allow the user to freely change a color tone of a sub video image set as a default independently of a color tone of a main video image. **SOLUTION:** A plurality of color pallet storage sections 622-626 required for color display of a sub video image are prepared. A color pallet modified and set freely by the user is stored to part (624) of the color pallet storage sections 622-626. A selector 628 by which the color pallet modified and set freely by the user is selected is provided so as to display the sub video image in a color tone desired by the user.
